

# JOURNAL OF SOLUTION CHEMISTRY

Vol. 9, No. 1

January 1980

---

## CONTENTS

Hydrophobic Interactions and Osmotic Second Virial Coefficients for Methanol in Water <i>Lawrence R. Pratt and David Chandler</i>	1
Viscosity of Aqueous Solutions of Univalent Electrolytes from 5 to 95°C <i>D. J. P. Out and J. M. Los</i>	19
The Ammonia-Ammonium Equilibrium in Seawater at Temperatures Between 5 and 25°C <i>Olof Johansson and Margareta Wedborg</i>	37
Enthalpies of Dilution of Aqueous Solutions of Formamide, Acetamide, Propionamide, and <i>N,N</i> -Dimethylformamide <i>Robert H. Wood and Laurence H. Hiltzik</i>	45
Enthalpies of Reaction and Reaction Rates by Flow Microcalorimetry: Ester Hydrolysis in Basic Medium <i>Alain Roux, Gérald Perron, Patrick Picker, and Jacques E. Desnoyers</i>	59

---

---

## CONTENTS

Tracer (Self)-Diffusion of Potassium Ion in NaCl-KCl-H <sub>2</sub> O Mixtures at 25°C	75
<i>L. W. Barr, Donald G. Miller, and Reginald Mills</i>	
Enthalpies of Dilution of Aqueous Electrolytes: The NaCl/H <sub>2</sub> O System	81
<i>L. E. S. Smith, John T. Cone, and W. Alexander Van Hook</i>	
Calorimetric Investigations of the Solvent Effect on Complex Formation Between Pyridine Derivatives and Molecular Iodine	97
<i>I. Uruska and H. Inerowicz</i>	
Ionization of Aqueous Toluic Acids: Conductance and Thermodynamics	109
<i>Laurence E. Strong, Thomas G. Copeland, Margaret Durragh, and Carter Van Waes</i>	
Triple Ion Formation in Solutions of Alkaline Sulfocyanides	129
<i>P. Bacelon, J. Corset, and C. de Loze</i>	
Solubility of Methane in Aqueous Solutions in Triethylenediamine	141
<i>John A. Muccitelli and Wen-Yang Wen</i>	

---

# JOURNAL OF SOLUTION CHEMISTRY

Vol. 9, No. 3

March 1980

## CONTENTS

- The Volume and Compressibility Change for the Formation of  
Transition Metal Sulfate Ion Pairs at 25°C 163  
*Antonio Lo Surdo and Frank J. Millero*
- Lithium-7 Nuclear Magnetic Resonance and Calorimetric Study  
of Lithium Crown Complexes in Various Solvents 183  
*Alfred J. Smetana and Alexander I. Popov*
- An NMR Study of Thallium Nitrate Ion Association in Liquid  
Ammonia 197  
*J. F. Hinton and K. R. Metz*
- Calibration of Conductance Cells at Various Temperatures 209  
*J. Barthel, F. Feuerlein, R. Neueder, and R. Wachter*
- Thermodynamics of Caffeine in Aqueous Denaturant Solutions 221  
*Attilio Cesàro, Elio Russo, and Dario Tessarotto*
-

## CONTENTS

1-H and 14-N NMR Relaxation Studies on Solutions of $\text{Mn}(\text{ClO}_4)_2$ in Acetonitrile <i>E. v. Goldammer and Ch. Bassaris</i>	237
Excess Heat Capacities and Orientational Order in Systems Containing Hexadecane Isomers of Different Molecular Structure <i>Sailendra N. Bhattacharyya and Donald Patterson</i>	247
Thermodynamics of Mixed Electrolyte Solutions. XI. An Isopiestic Study of the Quaternary System $\text{NaCl-KCl-CaCl}_2\text{-H}_2\text{O}$ at 25°C <i>D. Saad, J. Padova, and Y. Marcus</i>	259
Copper(II) Ion Hydrolysis in Aqueous Solution <i>Anthony J. Paulson and Dana R. Kester</i>	269
Measurement of the Stability Constants for Aqueous Calcium and Magnesium Nitrite by Raman Spectroscopic Methods <i>M. H. Brooker and B. S. DeYoung</i>	279
Conductance of Tris(hydroxymethyl)aminomethane Hydrochloride ( $\text{Tris}\cdot\text{HCl}$ ) in Water at 25 and 37°C <i>S. David Klein and Roger G. Bates</i>	289
Solvent Effects on the Dissociation of Weak Acids of Three Charge Types in Water/ <i>N</i> -Methylacetamide Media <i>Richard A. Butler, Carmen A. Vega, and Roger G. Bates</i>	293
Notice of Meeting	303

## CONTENTS

- Freezing Points and Enthalpies of Dilution of Aqueous Formic, Acetic, Propionic, and Butyric Acids. Free Energies and Enthalpies of Solute-Solute Interactions 305  
*Alexander L. Harris, Peter T. Thompson, and Robert H. Wood*
- Pressure Effects on Aminonaphthalene Dye Fluorescence in  $\text{H}_2\text{O}$  and  $\text{D}_2\text{O}$  325  
*C. J. Mastrangelo and H. W. Offen*
- Solute-Solvent Interactions in Water-Rich Mixtures. I. Ionic Conductances in Water-Acetonitrile Mixtures at  $25^\circ\text{C}$  331  
*Giuseppe Petrella, Maurizio Castagnolo, Antonio Sacco, and Mario Petrella*
- Correlation Between Thermodynamic Properties and Coordination States of Aqueous Bivalent Transition Metal Sulfates 341  
*Włodzimierz Libuś, Teresa Sadowska, and Zofia Libuś*
- Electrical Conductance and Ionic Association of the Bivalent Transition Metal Tetrafluoroborates in Acetonitrile Solution 355  
*Włodzimierz Libuś, Bogdan Chachulski, and Leszek Frączyk*
-

# JOURNAL OF SOLUTION CHEMISTRY

Vol. 9, No. 6

June 1980

---

## CONTENTS

- The Pair Correlation Function  $g_{+-}(r)$  Implied by Bjerrum's Theory  
of Ion Pairing 371  
*Harold L. Friedman*
- Study of Weak  $Mn^{2+}$  and  $Cu^{2+}$  Complexes by a Nuclear Magnetic  
Resonance Method 381  
*M. Holz, N. W. Lutz, F. Blumenthal, and H. G. Hertz*
- Single-Ion and Molar Conductances. Application to Transference  
Number Data Analysis 395  
*Jacques Périé, Michèle Périé, and Jean-Claude Justice*
- The Solubility of Magnetite and the Hydrolysis and Oxidation of  
 $Fe^{2+}$  in Water to 300°C 415  
*Peter R. Tremaine and Jacques C. LeBlanc*
-

July 1980

## ROBINSON MEMORIAL ISSUE

### CONTENTS

Introduction to the Robinson Memorial Issue <i>Robin H. Stokes</i>	445
The Temperature Variation of the Harned Coefficient in the System HCl-NaCl <i>R. A. Robinson</i>	449
Standardization of Silver-Silver Chloride Electrodes from 0 to 60°C <i>Roger G. Bates and R. A. Robinson</i>	455
Activity Coefficient of Hydrochloric Acid in HCl/MgCl <sub>2</sub> Mixtures and HCl/NaCl/MgCl <sub>2</sub> Mixtures from 5 to 45°C <i>D. Richard White, Jr., R. A. Robinson, and Roger G. Bates</i>	457
Mutual Diffusion Coefficients, Electrical Conductances, Osmotic Coefficients, and Ionic Transport Coefficients $l_{ij}$ for Aqueous CuSO <sub>4</sub> at 25°C <i>Donald G. Miller, Joseph A. Rard, Lee B. Eppstein, and R. A. Robinson</i>	467
Density, Viscosity, Conductance, and Transference Number of Concentrated Aqueous Magnesium Chloride at 25°C <i>Sonny Phang and R. H. Stokes</i>	497
Activity Coefficients of Electrolytes in Binary Mixtures Calculated Using Total Molal Quantities <i>Tiong-Koon Lim, Chee-Yan Chan, and Kean H. Khoo</i>	507
Determination of Standard pH Values for Sodium Hydrogen Diglycolate Buffer (0.05 <i>m</i> ) from 5-65°C <i>Arthur K. Covington and John Cairns</i>	517
Ionic Strength Dependence in Dilute Common-Ion Electrolyte Mixtures <i>Harold L. Friedman</i>	525
Application of Pitzer's Equations on the System HCl + MnCl <sub>2</sub> + H <sub>2</sub> O at Various Temperatures. V. <i>Rabindra N. Roy, James J. Gibbons, Jonathan K. Trower, and Gregory A. Lee</i>	535

## CONTENTS

Some Solvent Properties of 3-Methylsydnone <i>Robert J. Lemire and Paul G. Sears</i>	553
Ion Pairing in Solutions of Sodium Tetraphenylborate <i>Silvia Schiavo, Raymond M. Fuoss, and Giancarlo Marrosu</i>	563
Ionic Interactions in Solutions. V. Transference Number Variation with Concentration—Contribution to a Theoretical Interpretation for Binary Symmetrical Electrolytes <i>Jean-Claude Justice, Jacques Périé, and Michèle Périé</i>	583
Prediction of Excess Enthalpies for Ternary Aqueous Solutions of Nonelectrolytes <i>Guido Barone, Giuseppina Castronuovo, and Vittorio Elia</i>	607
Mobilities and Ion Pairing in $\text{LiB}(\text{OH})_4$ and $\text{NaB}(\text{OH})_4$ Aqueous Solutions. A Conductivity Study <i>Horacio Corti, Rosa Crovetto, and Roberto Fernández-Prini</i>	617

## CONTENTS

<b>Editorial Announcement</b>	<b>627</b>
<i>Robert L. Kay</i>	
<b>Microheterogeneity in Aqueous-Organic Solutions: Heat Capacities, Volumes and Expansibilities of Some Alcohols, Aminoalcohol and Tertiary Amines in Water</b>	<b>629</b>
<i>Genevieve Roux, David Roberts, Gerald Perron, and Jacques E. Desnoyers</i>	
<b>Ion Sites in Deuterated Dimethylsulfoxide Solutions of <math>\text{NaNO}_3</math> and Cryptand Complexed <math>\text{NaNO}_3</math> by Digital Infrared Spectroscopy</b>	<b>649</b>
<i>Walter F. Edgell and Danni Harris</i>	
<b>Partial Molal Volumes of Ions in Organic Solvents. IV. Ethylene Glycol</b>	<b>667</b>
<i>R. Zana, G. A. Lage, and C. M. Criss</i>	
<b>Studies on Silver(I) Solvation in Binary Solvent Mixtures Containing Dimethylsulfoxide. IV. Determination of Solvent Transference Numbers for <math>\text{AgSCN}</math> and Ionic Coordination Numbers of <math>\text{Ag}^+</math> in Methanol-Dimethylsulfoxide Mixtures at <math>25^\circ\text{C}</math></b>	<b>683</b>
<i>L. Rodehüser and H. Schneider</i>	
<b>Sodium-23, Cesium-133 and Thallium-205 NMR Study of Sodium, Cesium and Thallium Complexes with Large Crown Ethers in Nonaqueous Solutions</b>	<b>701</b>
<i>Mojtaba Shamsipur, Gholamhossein Rounaghi, and Alexander I. Popov</i>	

## CONTENTS

Acoustic Absorption in Aqueous Potassium Phosphate <i>L. Madsen, L. J. Slutsky, R. D. White, and J. Harkness</i>	715
Solvation of Bivalent Transition Metal Cations. I. Heats of Transfer of the Metal Perchlorates Between Water, Acetonitrile, and Dimethylsulfoxide <i>W. Libuś, M. Meçik, and H. Strzelecki</i>	723
Free Energies of Transfer of Complexes of the Type $MCl_2py_4$ between Pyridine and Other Solvent Media <i>W. Libuś, B. Janaszewski, R. Pastewski, and H. Twardowska</i>	737
Thermodyanmics of Mixtures of Hexane and Heptane Isomers with Normal and Branched Hexadecane <i>Michel Barbe and Donald Patterson</i>	753
Temperature and Composition Dependences of the Heat of Mixing of MBBA with Hydrocarbon <i>Melvin D. Croucher and Donald Patterson</i>	771
Activity Coefficients for the System $HBr + SrBr_2 + H_2O$ at 25°C <i>Tiong-Koon Lim, Kean H. Khoo, and Chee-Yan Chan</i>	785
Thermodynamics of Aqueous Mixtures of Nonelectrolytes. I. Excess Volumes of Water - n-Alcohol Mixtures at Several Temperatures <i>George C. Benson and Osamu Kiyohara</i>	791
On the Conductivity of an 0.01 D Aqueous Potassium Chloride Solution <i>K. N. Marsh</i>	805

## CONTENTS

<b>Apparent Molal Volumes of Phosphonium Halides at 15, 25 and 35°C</b>	<b>809</b>
<i>Katsuko Takaizumi and Toshiki Wakabayashi</i>	
<b>Viscosities of Aqueous Solutions of Quaternary Phosphonium Bromides at 15, 25 and 35°C</b>	<b>819</b>
<i>Katsuko Takaizumi and Toshiki Wakabayashi</i>	
<b>Solute-Solvent Interactions in Water-tert-Butyl Alcohol Mixtures. X. Partial Molal Volumes of Alkali and Halide Ions</b>	<b>827</b>
<i>M. Dollet, J. Juillard, and R. Zana</i>	
<b>Solute-Solvent Interactions with Metal Chelate Electrolytes. Part III. Salting in of Tris(acetylacetonato)cobalt(III) and Benzene by Aromatic and Aliphatic Ions</b>	<b>841</b>
<i>Etsuro Iwamoto, Yoshie Tanaka, Hirofumi Kimura, and Yuroku Yamamoto</i>	
<b>Partial Molal Volumes, Expansibilities, and Compressibilities for Aqueous Alcohol Solutions Between 5°C and 40°C</b>	<b>857</b>
<i>Harald Høiland</i>	
<b>Hydrophobic Effect in Aqueous Solutions of Nonelectrolytes. II. Cross-Interactions of Alkylureas</b>	<b>867</b>
<i>Guido Barone, Giuseppina Castronuovo, Attilio Cesáro, and Vittorio Elia</i>	
<b>Unusual Ion Pairs and Their Relationships to Acid Ionization</b>	<b>877</b>
<i>O. D. Bonner</i>	
<b>Stability Constants of Iron(III) Borate Complexes</b>	<b>885</b>
<i>Jane A. Elrod and Dana R. Kester</i>
